Abstract

Learning media is a communication tool used in the learning process to bring information in the form of teaching material from teachers to students so that students become more interested in participating in learning activities. Social Science (IPS) is one of the subjects given in elementary schools that examines a set of events, facts, concepts, and generalizations related to social issues. The Social Sciences (IPS) subjects include geography, history, sociology, and economics. This writing aims to: identify learning media based on local wisdom in IPS learning, and identify good learning media in social studies learning. The method used in this writing uses literature studies from various national and international journals. The results of the writing show that: local wisdom-based learning media in social studies learning are more effective and efficient in providing knowledge and understanding to students from an early age, so that students can maintain, preserve and have awareness of cultural values, and conventional as well as learning media. digital is good for use in social studies learning.
